

Gender Pay Gap Report Snapshot Date: 31st March 2022

As an employer we are required by law to carry out Gender Pay Reporting under the Equality Act 2010 (Gender Pay Gap Information) Regulations 2017. This involves carrying out six calculations that show the difference between the average earnings of men and women across the Trust.

The East Midlands Education Trust is committed to equality for all staff irrespective of gender. Our clear Pay Policy includes nationally negotiated pay scales, with Teaching scales aligned to the School Teachers' Pay and Conditions Document and Associate pay aligned to the National Joint Council for Local Government Services. Associate pay is also subject to a transparent Job Evaluation process, using the London Job Evaluation Scheme, to ensure that all staff are paid equally for work of equal value. Staff move through the pay scales for their grade based on performance, measured through the annual Appraisal process.

DESCRIPTION	March	March	March	March	March	March
	2022	2021	2020	2019	2018	2017
Mean average	19.1%	19.7%	17.1%	21.9%	20.0%	22.5%
gender pay gap						
Median average	30.2%	45.6%	36.1%	44.6%	39.3%	47.1%
gender pay gap						
Mean average	0%	0%	0%	0%	0%	0%
bonus gender pay						
gap						
Median average	0%	0%	0%	0%	0%	0%
bonus gender pay						
gap						
Proportion of males	0% / 0%	0% / 0%	0% / 0%	0% / 0%	0% / 0%	0% / 0%
and proportion of						
females receiving a						
bonus payment						

Using pay data for the 2199 members of EMET staff employed on 31st March 2022 (the snapshot date) the following calculations were made:

Proportion of males and females when divided into four groups ordered from lowest to highest									
рау									
	March 2022		March 2021		March 2020		March 2019		
	Male	Female	Male	Female	Male	Female	Male	Female	
Q1 – Top quartile (550 staff)	36.6%	63.4%	35.5%	64.5%	36.5%	63.5%	38.2%	61.8%	
Q2 – Upper middle quartile (550 staff)	22.7%	77.3%	25.1%	74.9%	30.9%	69.1%	30.6%	69.4%	

Q3 – Lower middle quartile (550 staff)	22.2%	77.8%	25.1%	74.9%	27.5%	72.5%	18.4%	81.6%
Q4 – Lower quartile (549staff)	14.2%	85.8%	14.9%	85.1%	17.2%	82.8%	18.3%	81.7%

The two lower quatiles remain dominated by women, however there has also been an increase in women in quartile 2. This explains the reduction of our median pay gap to 30.2%. In education staffing it is common to see an 80:20 female to male split. Overall, it can be seen that the gender pay gap is a result of a higher number of women in lower graded roles. This is traditionally the case in schools as many of the lower graded posts work during term time only or have working hours which fits around school times. As a society the norm is still for the female parent to carry out the majority of childcare responsibilities in the home, and these roles tend to favour families with school age children.

However, when the gender pay gap was calculated separately for teaching and associate staff the figures for each staff group were very different from the overall calculations:

TEACHING STAFF	March 2022	March 2021	March 2020	March 2019	March 2018	March 2017
Mean average gender pay gap	7.2%	6.0%	5.7%	6.0%	4.4%	6.3%
Median average gender pay gap	4.5%	0%	3.6%	0%	0%	0.1%

ASSOCIATE STAFF	March	March	March	March	March	March
	2022	2021	2020	2019	2018	2017
Mean average gender pay	4.0%	7.1%	5.7%	5.1%	7.2%	6.2%
gap						
Median average gender	1.9%	5.8%	3.9%	0%	1.4%	1.7%
рау дар						

The gender pay gap reduces significantly when staff are compared only to those in the same occupational group, with both mean and median figures being well below the national average.

It is encouraging that the mean and median figures for associate staff have reduced quite significantly this year, supporting our confidence that our staff across the Trust are being paid the same for work of equal value, regardless of gender.

Reducing the Gender Pay Gap

In August 2018, the Government Equalities Office published a paper of evidence based actions for employers to take to reduce their gender pay gap. Of the multiple actions evaluated in the paper, six are listed as being 'Effective', having been tested in real world settings and found to have a positive impact. Currently EMET has embedded four of these six actions into our working practices:

1. Use skill based assessment tasks in recruitment

All posts that are recruited to within the Trust are subject to skill based assessment tasks as part of the interview process. Teachers are expected to teach a typical lesson, TAs are

assessed for their interaction with students and administrative staff complete written and/or practical tests relevant to the role they have applied for. These tests carry equal weight within the recruitment process to the formal interview.

- 2. <u>Use structured interviews for recruitment and promotions</u> All interviews conducted in the Trust are structured, with questions set in advance and asked of all candidates in order to compare answers objectively.
- Encourage salary negotiations by showing salary ranges
 All posts are advertised with a salary range. These ranges are set by job evaluation for
 associate posts and by the teachers' pay bands for teaching posts. There is additional
 flexibility for schools to offer recruitment and retention allowances to encourage high
 quality candiates for shortage roles.
- 4. <u>Introduce transparency to promotion, pay and reward processes</u> All promotion, pay and reward processes are transparent within the Trust. Pay and reward is clearly set out within the EMET Pay Policy which is reviewed and updated regularly.

The two other areas are:

- Include multiple women in shortlists for recruitment and promotions
 While we do not insist that a women is shortlisted for every role, the shortlisting process is
 completed using the skills set out in the application form and gender does not play a role,
 therefore women have an equal chance of being selected as men.
- Appoint diversity managers and/or diversity task forces
 We currently do not have specific diversity focused staff in school, but schools are aware of
 diversity matters and seek advice where needed. Again, the recruitment process is focused
 on the applicants skills and experience and does not consider gender as part of that process.

Overall, the Trust is working to reduce the Gender Pay Gap.

I can confirm that the above information has been prepared from payroll data on the snapshot date and fairly represents the Gender Pay Gap figures for the East Midlands Education Trust for 2022.
